

Double-sided **cop winding** machine with electronic yarn guide for the creation of **binding spools** for fancy yarn machines with hollow spindle and spiral winding machines.

1

Double-sided cop winding machine with electronic yarn guide for the creation of binding spools for fancy yarn machines with hollow spindle and spiral winding machines.

2

- Possibility to produce 4 types of packaging:
- **Bottle**
- **Cylindrical**
- **Cops**
- **Cylindrical + cops**

Through PC Touch Screen you can enter and save all the work data and technical parameters of the final yarn and control the machine's functionalities.

The PLC manages the precise execution of the data, ensuring the exact speed of the axes in a millesimal measure with exceptional results on the quality of the effects of the final product. Extremely easy to enter and edit general data in a step-by-step or quick mode. Diagnostics for the detection of the state of the machine.

Double-sided **cop winding** machine with electronic yarn guide for the creation of **binding spools** for fancy yarn machines with hollow spindle and spiral winding machines.

TECHNICAL DATA

Spindles/section	8 (4x2) / 12 (6x2) / 24 (12x2)
Gauge [mm]	200 mm
Cone height [mm]	220 mm
Flanges diameter [mm]	95 mm
Max spindles speed [rpm]	9.300 rpm
